WHO AM I?

I'm a curious and adaptable full-stack developer with a passion for learning through play. With roots in the arts, I bring a creative, systems-level perspective to software engineering, thinking outside the box to design tools and workflows that simplify complexity, reduce friction, and empower teams to move faster. I enjoy working across the stack, from infrastructure and backend services to the interfaces people actually touch, and I care as much about the developer experience of a system as the end-user experience of it. Outside of work, you'll find me reading philosophy, building and collecting synthesizers, or doting on my two cats.

EXPERIENCE

2025–Present

Assoc. Software Development Engineer

Hasbro Inc. Central Technology

Core contributor to a company-wide replacement of the legacy identity system with a new OIDC-compliant platform backed by Auth0. Led the migration of two websites from a shared EKS cluster into isolated Fargate deployments, enabling automatic parallel feature-branch environments for each merge request. Led the front-end social identity linking initiative, enabling users to log in with their existing game console credentials.

Next.js / Go / AWS CDK / DataDog

2023–2025

Assoc. Software Development Engineer

Hasbro Inc. Digital Engineering

Built internal tools used daily by the Funlab, Model Shop, and Global Marketing teams. Contributed to the *Trivial Pursuit Infinite* (web) game, along with its Unity counterpart. Instrumented A/B testing for the Secret Lair website using the Optimizely platform.

Express.js / Rancher / MongoDB

2018–2023

Digital Asset Administrator

Hasbro Inc. Global Marketing

Managed the enterprise media asset database for global marketing campaigns, ensuring secure IP handling and enabling efficient regional ad localization for international teams. Built automated ingestion and shipping pipelines, reducing asset processing times by 40%.

Flask / CatDV / Adobe Workfront

Fall 2017

Graduate Teaching Assistant

School of the Art Institute of Chicago

Supported course logistics and communications for *Programming for Sound: Max/MSP*. Led weekly review sessions and office hours translating complex programming and signal processing concepts into accessible material for students from non-technical backgrounds.

Max/MSP / Open GL / JavaScript

CERTIFICATIONS

2026

AWS Certified Cloud Practitioner

AWS / Pearson VUE

Cloud / Serverless / k8s

2020

Professional Certificate in Computer Science for Web Programming

HarvardX / edX online

React / Django / mySQL

EDUCATION

2015

Brown University

Bachelor of Arts degree in *Computer Music & Multimedia*
